Not all of them will work for every site, but all of them are intended for use by all entrepreneurs with online sites, not just internet marketers, niche marketers or affiliates, but not to the exclusion of them either.

Introduction

The my business is based on one concept: if I can get web traffic to my site, anyone can.

If you know me, you might think that sounds strange. After all, I'm one of a handful of website promotion specialists in the world. But I wasn't born [The Traffic Queen](#), as Marlon Sanders calls me.

There was once a time when I was sitting in my kitchen, looking at my computer, wondering if I could get my rent out of it,

- having lost my job on the last day of the long-term disability,
- with a bad back problem, therefore,
- unfit to work a regular job,
- soon to be without health insurance,
- and no prospects.

At the time I was an affiliate marketer and owned a site that brought in the equivalent of a week's paycheck with banner ads. So I knew if I could increase my traffic without spending any money, I'd be safe, at least for a while.

So I pored the internet for every possible way I could find to get visitors to my site. And I learned a lot, for instance:

- ✓ untargeted visitors make you no money
- ✓ shortcuts are just a long way to failure, and
- ✓ even the best traffic will get you only mediocre results compared t the kind of business you can build when you have a follow-up system in place.

All of what I learned about traffic is from the school of hard knocks and testing on my own sites, and with permission, my client's sites. If it doesn't work, I don't do it. If it does, well, that's how this guide got into your hands. 😊

Of course, there's so much more to getting visitors to your site, which is ultimately why I created an entire site about it, where I demonstrate how much traffic you can get by [using the free traffic methods alone](#).

One day I got to thinking – I just don't get to talk about tips as much as I used to... and I went on a hunt for lists like the ones I used to read.

To say I was disappointed would be an understatement. People just aren't as willing as they used to be to give this kind of information at no charge. Even a list of tips half the size of this one seems to be worth \$27, and I guess it makes sense that people are willing to pay for this information, considering how getting visitors impacts your sales and leads.

So I decided to make one myself. I realized that I had so many tips, and was collecting new ones at such a rate that it would take me a while.

A while turned into 2 years - by the time I got finished writing I had about 3000 tips.

But who's going to read that, right?

So I turned some into blog posts, took out all the tips that were really details about other methods, and came up with around 400 decent ones.

That didn't sound like a fun number, so I thought about it, and the ideal number seems to be 366, enough for every day of a leap year. In my new membership site, [Traffic Reality](#), I've started to release a daily audio tip in our bonus section, detailing the finer points of each tip in 5 to 15 minutes a day.

(Yes. That's just the BONUS.)

I'm also integrating audio and video details about these tips in the upgrade to [The Evergreen Traffic System](#), a PDF, audio and video guide I recently

created with the help of a great guy who was a guru before I even had a website, Marlon Sanders.

Evergreen goes into a lot more detail about how I was able to continue building my business empire even when I was too sick to work – a traffic system so good, even dead sites couldn't turn it off.

I hope you have fun with the methods on this list, and of course, that they bring you thousands upon thousands of visitors.

As mentioned, each of them is actually a traffic method, not just a tip about the finer strategy points of getting traffic, but actual tactics for bringing visitors to your site. If I were you I'd dedicate a few minutes a day to learning about each one and attempt to implement as many as you can.

For your convenience, I've organized them by type – that way if you already have some knowledge in a certain area, you can build on that for a faster start.

Enjoy!

Thanks,

Tinu

366 Traffic Methods

The following is a list of traffic *methods* – meaning you're not going to find a list of 50 social bookmarking sites to submit to as numbers 25 – 75 on the list.

"Use social bookmarking" is ONE tip – listing them as more than one would be cheating. ;)

I didn't have a lot of time to edit the list, so if you find the same tip repeated identically, comment on the blog post where you saw this list and I'll replace that tip with a new one, crediting you.

To learn more about how to implement these tips, you can join Traffic Reality – as a bonus, I go over one of these methods each day in a daily audio post.

If you're really serious about getting more traffic, leads and sales, you'll want to get access to my guide to getting visitors, traffic and sales from a system you jump-start for six weeks, that keeps working to bring you leads even if you go on vacation. It's called The Evergreen Traffic System, and I'm now updating it quarterly with more in-depth coverage of the tips in these guides.

Or you can always get my team to actually do it for you.

Curious about whether you can trust me to help you? Google me, see a video of my website traffic, or scroll down to the live grid of my search rankings. After all, the best way to know whether you can trust a web site promotion specialist is to see if they do what they teach.

Conclusion

Well, that's it.

Those are 366 Traffic Methods, enough for one each day during a leap year. I realize I left out some big ones, like the few dozen ways you can get traffic from mobile phone placement and advertising, and buying pay per action ads. But with over 3000 tips in my library, I had to leave *something* out.

I hope I've given you enough to start with whether you're a complete newbie to traffic generation or advanced in online marketing methods.

Remember, if you want to learn more details on any specific method, come to Traffic Reality.

And there's always the Evergreen Traffic System, for creating a whirlwind of visitors to your site that keeps coming even if you have to stop.

One final word of advice while applying any of these traffic methods.

Your success in getting traffic is as much about **how** you apply these tips as it is about picking the methods that go best with your site, as well as personal marketing style.

So, how should you apply them?

As if your number one concern was to connect people you can help to a problem you can solve for them.

Like you know that on the other end of every traffic campaign are people, not numbers.

With respect for your fellow humans.

While always asking the question "Would I respond positively to that tactic

if it was directed at me?"

Keep those few things in mind every time you promote your site and you can't go wrong.

Thanks for Your Time, and....

Happy Traffic Getting!
